## Overview

This ETF provides high monthly distributions and the opportunity for capital appreciation through an investment in an actively managed portfolio of large-cap global dividend growth companies selected by Brompton, complemented by a proprietary covered call options program.

Our PM team first uses a top-down analysis to identify attractive sectors. Rigorous fundamental analysis focuses the portfolio on at least 20 Global Dividend Growth Companies with a market capitalization of at least \$10 billion, that have a history (or in the Manager's view a future likelihood) of dividend growth. The PMs then set the level of covered call writing (up to a maximum of 33%) with the goal of optimizing distributable cash and total returns, while reducing portfolio volatility.

## Investment Highlights: Global Dividend Growers

- Global Dividend Growth shares have outperformed the MSCI World Index over the past 15 years, with less risk<sup>3</sup>
- Opportunity to access a broader universe of high quality global companies that are expected to achieve strong earnings growth, leading to potential share price appreciation and increased dividends
- Global equities provide opportunity for Canadians to diversify in sectors that are underrepresented in Canada

<sup>(2)</sup> Source: Thomson Reuters as at May 31, 2020. Reflects the weighted average ESG Score of the companies held in the portfolio. The ESG Score is an overall score of a company based on the reported information in the environmental, social and corporate governance pillars. Letter grades range from D- for the lowest ESG scores to A+ for the highest scores. <sup>(5)</sup> Returns are for the periods ended May 31, 2020. Inception date October 17, 2018. The table shows the ETF's compound returns for each period indicated compared with the MSCI World Index ("MSCI Index"). The MSCI Index captures large and mid cap representation across 23 Developed Markets countries. The MSCI Index covers approximately 85% of the free float-adjusted market capitalization in each country. The ETF invests in at least 20 global dividend growth companies with market capitalization of at least \$10 billion. It is therefore not expected the ETF's performance will mirror that of the MSCI Index which has a more diversified portfolio. Further, the MSCI Index is calculated without the deduction of management fees, fund expenses and trading commissions whereas the performance of the ETF is calculated after deducting such fees and expenses.
