

# Brompton Global Dividend Growth ETF

**TSX:BDIV**

## October, 2020 Overview

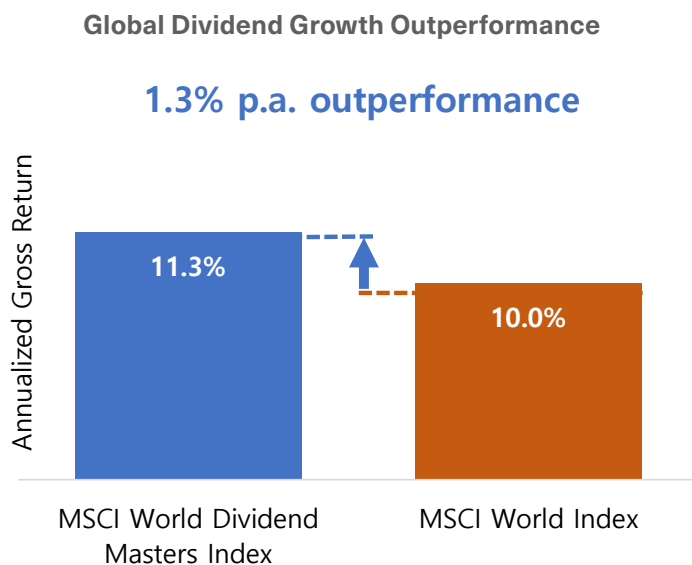

This ETF provides high monthly distributions and the opportunity for capital appreciation by investing in an actively managed portfolio of large-cap global dividend growth companies selected by Brompton, complemented by a proprietary covered call options program to enhance monthly income.

Our PM team first uses a top-down analysis to identify attractive sectors. Rigorous fundamental analysis focuses the portfolio on at least 20 global Dividend Growth Companies with a market capitalization of at least \$10 billion, that have a history (or, in the Manager’s view, a future likelihood) of dividend growth. The PMs then set the level of covered call writing (up to a maximum of 33%) with the goal of optimizing distributable cash and total returns and reduce portfolio volatility.

## GLOBAL DIVIDEND GROWTH - INVESTMENT RATIONALE

### 1 Dividend Growth Offers Higher Returns with Lower Risk

Since 2010, the MSCI World Dividend Masters Index (an index of global dividend growth equities) has outperformed the MSCI World Index by 1.3% per annum while those returns have been less risky (1.5% per annum less annualized volatility).<sup>1</sup>

### 2 Economy Recovering

Unprecedented levels of monetary and fiscal stimulus issued by central banks and governments globally in response to the COVID-19 pandemic is expected to support economic growth.

The International Monetary Fund forecasts that the global economic recovery is expected to strengthen in 2021.
