Overview

This ETF provides monthly distributions and the opportunity for capital appreciation through an investment in an actively managed portfolio of large-cap North American-listed financial services companies selected by Brompton, complemented by a proprietary covered call options program.

Our PM team first uses a top-down analysis to identify attractive sub-sectors. Rigorous fundamental analysis focuses the portfolio on at least 15 North American Financial Services Companies with a market capitalization of at least \$5 billion. The PMs then actively set the level of covered call writing (up to a maximum of 33%) with the goal of optimizing distributable cash and total returns, while reducing portfolio volatility.

⁽²⁾ Source: Thomson Reuters as at April 30, 2020. Reflects the weighted average ESG Score of the companies held in the portfolio. The ESG Score is an overall score of a company based on the reported information in the environmental, social and corporate governance pillars. Letter grades range from D- for the lowest ESG scores to A+ for the highest scores. See https://www.refinitiv.com/content/dam/marketing/en_us/documents/methodology/esg-scores-methodology.pdf for more information.

⁽³⁾ Returns are for the periods ended April 30, 2020. Inception date October 17, 2018. The table shows the ETF's compound returns for each period indicated compared with the S&P/TSX Capped Financials Index ("Financials Index") and the S&P 500 Financials Index ("S&P Index") (together the "Indices"). The Financials Index is comprised of constituents of the S&P/TSX Composite Index that are classified as members of the financial sector with individual constituents capped at 25% weight. The S&P Index is comprised of constituents of the S&P 500 Index that are classified as members of the financial sector with individual constituents capped at 25% weight. The ETF invests in at least 15 North American Financial Services companies with market capitalization of at least \$5 billion. It is therefore not expected the ETF's performance will mirror that of the Indices which have more diversified portfolios. Further, the Indices are calculated without the deduction of management fees, fund expenses and trading commissions, whereas the performance of the ETF is calculated after deducting such fees and expenses.
