Overview

This ETF provides monthly distributions and the opportunity for capital appreciation through an investment in an actively managed portfolio of large-cap North American-listed financial services companies selected by Brompton, complemented by a proprietary covered call options program.

Our PM team first uses a top-down analysis to identify attractive sub-sectors. Rigorous fundamental analysis focuses the portfolio on at least 15 North American Financial Services Companies with a market capitalization of at least \$5 billion. The PMs then actively set the level of covered call writing with the goal of optimizing distributable cash and total returns, while reducing portfolio volatility.

The FundGrade rating system is independently measured by Fundata and evaluates Canadian investment funds based on their risk-adjusted performance, measured by Sharpe Ratio, Sortino Ratio, and Information Ratio. The score for each ratio is calculated individually, covering all time periods from 2 to 10 years. The scores are then weighted equally in calculating a monthly FundGrade. The top 10% of funds earn a A Grade; the next 20% of funds earn a B Grade; the next 40% of funds earn a C Grade; the next 20% of funds receive a D Grade; and the lowest 10% of funds receive an E Grade. To be eligible, a fund must have received a FundGrade rating every month in the previous year. For more information, see <http://fundata.com/ProductsServices/FundGrade.aspx>.
