

# Brompton European Dividend Growth ETF

TSX:EDGF

## Overview

This ETF provides high monthly distributions and the opportunity for capital appreciation through an investment in an actively managed portfolio of large cap European dividend growth companies selected by Brompton, complemented by a proprietary covered call options program.

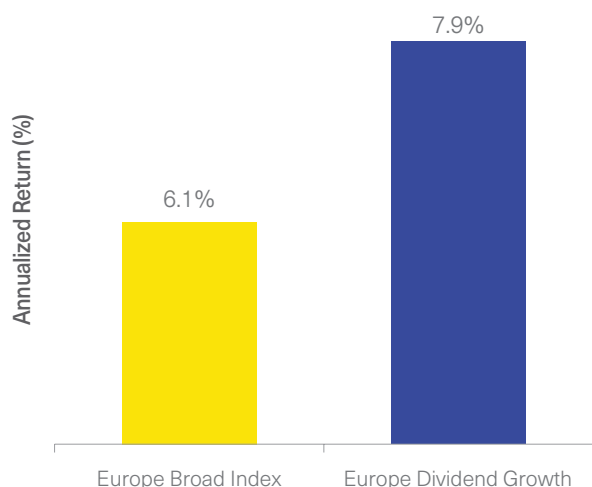

Our Portfolio Management team first uses top-down analysis to identify attractive sectors. Rigorous fundamental analysis focuses the portfolio on large capitalization European equities that have a history (or in the managers view, a future likelihood) of dividend growth. The Portfolio Managers then set the level of covered call writing, with the goal of optimizing distributable cash and total returns while reducing portfolio volatility.

## EUROPEAN DIVIDEND GROWTH - INVESTMENT RATIONALE

### 1 Dividend Growth Offers Higher Returns with Lower Risk

Since 2010, the MSCI Europe Dividend Masters Index (an index of European dividend growth equities) has outperformed the MSCI Europe Index by 1.7% per annum while those returns have been less risky (1.9% per annum less annualized volatility).<sup>1</sup>

#### European Dividend Growth Outperformance<sup>1</sup>

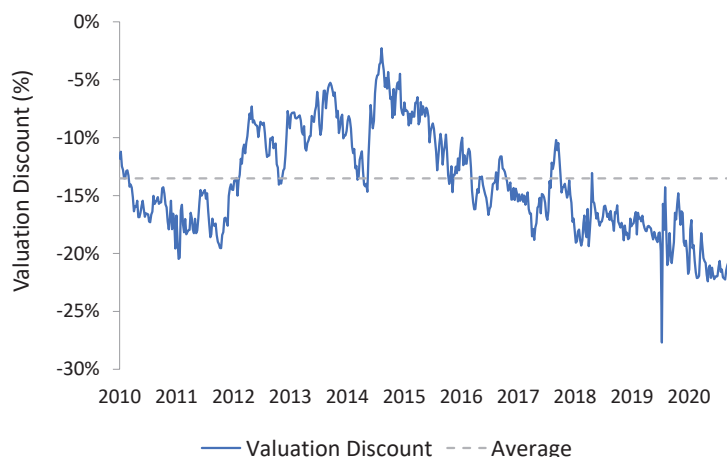

### 2 Valuation Reasonable Given Growth Prospects

European equities are currently trading at a 19% discount to U.S. equities, near the low end of the ten-year range.<sup>2</sup>

Manager believes a strengthening Euro, increasing risk appetite, and better control of COVID-19 in Europe relative to the U.S. should boost European equity valuations.
