### This ETF is for investors who are:

- Seeking monthly cash distributions
- Seeking stable net asset value
- Seeking primarily investment-grade income sources

### Overview

This ETF seeks to provide: (i) stable monthly cash distributions; and (ii) a stable net asset value. The ETF invests in an actively managed portfolio consisting primarily of U.S. dollar denominated corporate preferred securities, trust preferred securities and other corporate debt. At least 75% of the ETF's portfolio (at the time of investment) consists of securities that are rated investment grade. The ETF employs a moderate amount of leverage to enhance distributable income and total return potential. Low borrowing costs and attractive current yields on US preferred securities allows the ETF to offer a high level of income relative to traditional fixed income investments.

The Sub-Advisor, Flaherty & Crumrine, is the longest tenured U.S. investment firm focusing exclusively on managing portfolios of preferred securities for institutional investors. The Sub-Advisor selects preferred investments for the portfolio, giving consideration to the opportunity for income, issuer and security diversification, credit quality and duration/interest rate sensitivity.

### Investment Highlights

U.S. preferred securities offer:

- Primarily investment-grade credit, with higher yield than many other fixed income categories
- Historical outperformance compared to the S&P/TSX Preferred Share Index with lower volatility
- Low correlation of returns; effective tool to diversify portfolio returns and risk
