Brompton Index One International Cash Flow Kings Index

The Index uses a rules-based methodology to gain exposure to shares of international publicly-listed companies with high free cash flow yields. The universe of the Index is comprised of mid- and large-cap international companies, excluding Financials. Financials companies are excluded since the nature of their businesses makes it difficult to define both debt and reinvestment (net capital expenditures and working capital), which are components of the free cash flow yield calculation.
