

SUB-ADVISOR COMMENTARY - MAY 31, 2019

The Fund returned (1.7%) for the month of April 2019. The Credit Suisse Leveraged Loan Index returned (0.23%) for the same period.

According to J.P. Morgan, the U.S. senior loan market like the majority of other U.S. capital markets fell in the month of May as investors were surprised by the deterioration of U.S.-China trade talks that were expected to reach a positive resolution in the month. Instead, negative trade rhetoric between the two countries ratcheted up, prompting investors to reassess global and U.S. growth expectations, along with expected policy responses from the U.S. Federal Reserve. The decline in the U.S. loan market however was modest in comparison to other U.S. corporate markets (i.e., high yield and equities), given their seniority in the corporate capital structure.

The May loan market decline was broad based with 18 of the 21 industries falling. The three exceptions generating positive results during the month were Utility, Transportation, and Broadcasting. Utility and Transportation, in particular, benefitted from the resetting of U.S. interest rate expectations with consensus views now indicating the potential for one to two Fed rate cuts before calendar year-end. Broadcasting held up in the period primarily due to positive idiosyncratic factors related to specific issuers within the industry. Falling the most in the month were issuers within higher beta industries Metals & Mining, Retail, and Telecommunications. In terms of default activity, there was a decline in both the number and volume of defaults during the period. Two companies totaling \$2.4bn (bonds \$2.1bn and loans \$303mn) defaulted in May, as compared to six defaults totaling \$8.1bn in April.

The portfolio benefitted from superior issue selection within select industries, most notably within Telecommunications and Consumer (Personal) Products. The loan of Sprint, a telecom company, rose on positive sentiment as the company is expected to benefit from strategic M&A activity. Within Consumer Products, exposure to the loan of Revlon, a multinational cosmetics and personal care company, also aided return as the company reported better-than-expected quarterly earnings. Notably detracting from performance was exposure to the re-org equity of Avaya, a telecom-related tech hardware company. The company's equity fell in sympathy with the broader U.S. stock market sell-off in the month (S&P 500 Index down -6.35%). Also detracting from absolute return was exposure to the loan of Walter Investment Management, a U.S. mortgage originator and servicer, which is in the midst of a formal restructuring.

Given the expected continued strength of the U.S. economy, we believe there remains a low probability of a near term U.S. recession and the 2019 corporate loan market default rate will remain below its historical average. This being said, we are vigilant of the potential impact of unresolved global macro events (e.g., U.S./China trade relations, Brexit, etc.) that may lead to short spikes in investor risk aversion and thus potential downward price volatility in the loan market. We are confident the portfolio's higher liquidity profile and credit quality bias relative to the broader loan market will serve investors well over the remainder of 2019.

Annual Compound Returns <sup>1</sup>	1-Year	3-Year	5-Year	Since Inception A & U <sup>2</sup>	Since Inception C & F <sup>3</sup>
Symphony Floating Rate Senior Loan Fund - Class A	1.7%	6.2%	3.4%	5.9%	-
Symphony Floating Rate Senior Loan Fund - Class C	1.4%	-	-	-	3.3%
Symphony Floating Rate Senior Loan Fund - Class F	1.4%	-	-	-	3.8%
Symphony Floating Rate Senior Loan Fund - Class U	2.3%	6.3%	3.3%	5.5%	-
Credit Suisse Leveraged Loan Index	4.0%	5.4%	3.9%	4.9%	4.3%

<sup>(1)</sup> Returns are for the periods ended May 31, 2019.

<sup>(2)</sup> Inception date November 1, 2011.

<sup>(3)</sup> Inception date January 10, 2017.

The table shows the Fund's compound returns for each period indicated compared with the Credit Suisse Leveraged Loan Index. The Credit Suisse Leveraged Loan Index ("Loan Index") is an appropriate benchmark as it is designed to mirror the investable universe of the US dollar denominated leveraged loan market in which the Fund also invests. The Loan Index is unleveraged and its returns are calculated without the deduction of fees, fund expenses, and trading commissions whereas the performance of the Fund includes the impact of leverage and is calculated after deducting such fees and expenses. Since the Fund is actively managed, the sector weightings may differ from those of the Loan Index.

Please read the Fund's annual information form and other public documents before investing.

You will usually pay brokerage fees to your dealer if you purchase or sell units of the Fund on the Toronto Stock Exchange or other alternative Canadian trading system (an "exchange"). If the units are purchased or sold on an exchange, investors may pay more than the current net asset value when buying units of the investment fund and may receive less than the current net asset value when selling them.

There are ongoing fees and expenses associated with owning units of an investment fund. An investment fund must prepare disclosure documents that contain key information about the Fund. You can find more detailed information about the Fund in the public filings available at [www.sedar.com](http://www.sedar.com). The indicated rates of return are the historical annual compound total returns including changes in unit value and reinvestment of all distributions and do not take into account certain fees such as redemption costs or income taxes payable by any securityholder that would have reduced returns. Investment funds are not guaranteed, their values change frequently and past performance may not be repeated.

Certain statements contained herein constitute forward-looking information within the meaning of Canadian securities laws. Forward-looking information may relate to matters disclosed in this document and to other matters identified in public filings relating to the Fund, to the future outlook of the Fund and anticipated events or results and may include statements regarding the future financial performance of the Fund. In some cases, forward-looking information can be identified by terms such as "may", "will", "should", "expect", "plan", "anticipate", "believe", "intend", "estimate", "predict", "potential", "continue" or other similar expressions concerning matters that are not historical facts. Actual results may vary from such forward-looking information. Investors should not place undue reliance on forward-looking statements. These forward-looking statements are made as of the date hereof and we assume no obligation to update or revise them to reflect new events or circumstances.
