Overview

This ETF provides high monthly distributions and the opportunity for capital gains through an investment in an actively managed portfolio of large cap global Technology companies selected by Brompton, complemented by a proprietary covered call program.

Our PM team first uses top-down analysis to identify attractive sub-sectors. Rigorous fundamental analysis focuses the portfolio on 15 to 20 global Technology companies which offer a combination of growth and value characteristics. The PMs then actively set the level of covered call writing (up to a maximum of 33%), with the goal of optimizing distributable cash and total returns while reducing portfolio volatility.

Investment Highlights: Technology Sector

Tech sector is profitable, with minimal debt and significant free cash flow.

Tech is under-represented in Canada; ETF provides diversification benefits.

Long term trends are supportive of Technology equities:

- **Technological Disruption:** Emerging technologies have the potential to reshape the world
- **Accelerating Adoption:** New technologies are being adopted more quickly than in the past
- **Demographics:** Millennials will continue to fuel demand for services such as mobile applications, user experiences, social media/messaging and e-commerce
- **Digitization:** Manual/offline businesses converting to online, networked platforms and computer supported environments, enabling real-time decision making and more efficient operations

⁽²⁾ Source: Thomson Reuters as at June 30, 2019. Reflects the weighted average ESG Score of the companies held in the portfolio. The ESG Score is an overall score of a company based on the reported information in the environmental, social and corporate governance pillars. Letter grades range from D- for the lowest ESG scores to A+ for the highest scores. See https://www.refinitiv.com/content/dam/marketing/en_us/documents/methodology/esg-scores-methodology.pdf for more information.

⁽⁴⁾ Returns are for the periods ended June 30, 2019. The table shows the ETF's compound returns for each period indicated compared with the S&P/TSX Composite Index ("Composite Index"), and the S&P 500 Information Technology Index ("S&P Technology Index"). The Composite Index tracks the performance, on a market weight basis, of a broad index of large-capitalization issuers listed on the TSX. The Technology Index, a sub-index of the S&P 500 Index, tracks the performance of major North American technology companies on a market weight basis. Since the indices contain a substantially large number of companies, it is not expected that the ETF's performance will mirror that of the indices. The benchmark indices are calculated without the deduction of management fees, fund expenses and trading commissions, whereas the performance of the ETF is calculated after deducting such fees and expenses.
