INVESTMENT APPROACH

Overview

This ETF provides high monthly distributions and the opportunity for capital appreciation through an investment in an actively managed portfolio of large cap European dividend growth companies selected by Brompton, complemented by a proprietary covered call options program.

Our PM team first uses top-down analysis to identify attractive sectors. Rigorous fundamental analysis focuses the portfolio on at least 20 large capitalization European equities that have a history (or in the managers view, a future likelihood) of dividend growth. The PMs then set the level of covered call writing (up to a maximum of 33%), with the goal of optimizing distributable cash and total returns while reducing portfolio volatility.

Investment Highlights: Europe

Why Invest In Europe?

- European companies are expected to grow earnings by 11.9% over the next year³
- Manager believes European equities are currently attractively valued and have significantly lagged the performance of their U.S. peers
- Diversification benefits: Europe provides an opportunity for Canadians to diversify by investing in equity sectors that are underrepresented in the Canadian market
