<sup>(2)</sup> Source: Thomson Reuters as at May 31, 2020. Reflects the weighted average ESG Score of the companies held in the portfolio. The ESG Score is an overall score of a company based on the reported information in the environmental, social and corporate governance pillars. Letter grades range from D- for the lowest ESG scores to A+ for the highest scores. <sup>(4)</sup> Returns are for the periods ended May 31, 2020. Inception date September 24, 2015. The table shows the ETF's compound return or each period indicated compared with the MSCI World Health Care Index ("Health Care Index") and the S&P/TSX Composite Index ("Composite Index") (together the "Indices"). The Health Care Index represents the healthcare industry group of the MSCI World Index. The Composite Index tracks the performance, on a market weight basis, of a broad index of large-capitalization issuers listed on the Toronto Stock Exchange. The ETF invests in at least 15 large-capitalization global healthcare companies. It is not expected that the ETF's performance will mirror that of the Indices, since the Health Care Index contains a substantially larger number of companies and the Composite Index is more diversified across multiple industries. Further, the Indices are calculated without the deduction of management fees, fund expenses and trading expenses, whereas the performance of the ETF is calculated after deducting such fees and expenses.
