Overview

This ETF provides high monthly distributions and the opportunity for capital appreciation through an investment in an actively managed portfolio of large cap global Healthcare companies selected by Brompton, complemented by a proprietary covered call options program.

Our PM team first uses top-down analysis to identify attractive sub-sectors. Rigorous fundamental analysis focuses the portfolio on 15 to 30 global Healthcare companies which offer a combination of growth and value characteristics. The PMs then actively set the level of covered call writing (up to a maximum of 33%), with the goal of optimizing distributable cash and total returns while reducing portfolio volatility.

Investment Highlights: Healthcare Sector

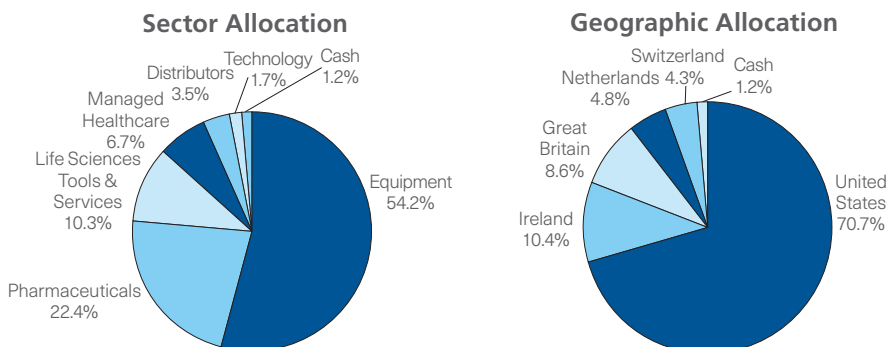

Strong historical earnings growth and stable relative share performance.

Under-represented sector in the Canadian equity market; diversification benefits.

Long term trends are supportive of healthcare equities:

- **Demographics:** Aging world population is expected to result in increased demand for healthcare products and services
- **Emerging Markets:** Rising incomes should lead to higher healthcare spending
- **Innovation:** Opening up new frontiers for services, equipment and therapies
- **Mergers & Acquisitions:** Potential for added value for investors

⁽²⁾ Source: Thomson Reuters as at October 31, 2019. Reflects the weighted average ESG Score of the companies held in the portfolio. The ESG Score is an overall score of a company based on the reported information in the environmental, social and corporate governance pillars. Letter grades range from D- for the lowest ESG scores to A+ for the highest scores. See https://www.refinitiv.com/content/dam/marketing/en_us/documents/methodology/esg-scores-methodology.pdf for more information.

⁽⁴⁾ Returns are for the periods ended October 31, 2019. The following table shows the ETF's compound return compared for each period indicated compared with the MSCI World Health Care Index ("Health Care Index") and the S&P/TSX Composite Index ("Composite Index") (together the "Indices"). The Health Care Index represents the healthcare industry group of the MSCI World Index. The Composite Index tracks the performance, on a market weight basis, of a broad index of large-capitalization issuers listed on the Toronto Stock Exchange. The ETF invests in at least 15 large-capitalization healthcare companies. It is not expected that the ETF's performance will mirror that of the Indices, since the Health Care Index contains a substantially larger number of companies and the Composite Index is more diversified across multiple industries. Further, the Indices are calculated without the deduction of management fees, fund expenses and trading expenses, whereas the performance of the ETF is calculated after deducting such fees and expenses.
