

Brompton Global Healthcare Income & Growth ETF

Overview

This ETF provides high monthly distributions and the opportunity for capital appreciation through an investment in an actively managed portfolio of large cap global Healthcare companies selected by Brompton, complemented by a proprietary covered call options program.

Our Portfolio Management team first uses top-down analysis to identify attractive sub-sectors. Rigorous fundamental analysis focuses the portfolio on global Healthcare companies which offer a combination of growth and value characteristics. The PMs then actively set the level of covered call writing, with the goal of optimizing distributable cash and total returns while reducing portfolio volatility.

GLOBAL TRENDS DRIVING LONG TERM GROWTH IN HEALTHCARE

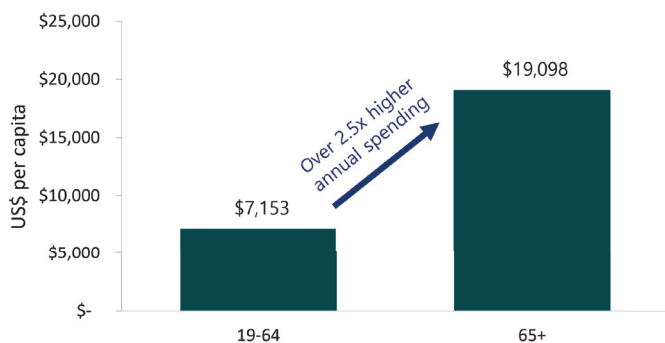

1 Aging Population Driving Higher Spending

Global population over the age of 65 is expected to reach 1.5 billion by the year 2050, more than double today's level.¹

The global average life expectancy is rising and now exceeds 80 years in some developed countries.¹

Healthcare spending increases with age; Americans over 65 spend 3x as much on healthcare than younger individuals.²

Annual Personal Healthcare Expenditures by Age

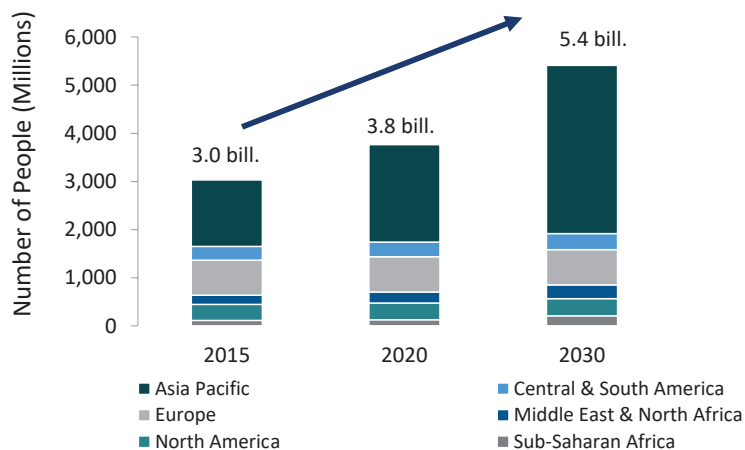

2 Rising Wealth and Healthcare Spending

Global healthcare spending is increasing dramatically, expected to reach US\$10 trillion by 2022³

Forecast growth in middle class population is expected to result in higher healthcare spending
