

Fund in focus: Brompton Split Banc Corp. (SBC), Life & Banc Split Corp. (LBS), Brompton North American Financials Dividend ETF (BFIN)

In March 2020, the Office of the Superintendent of Financial Institutions (OSFI) announced that Canadian banks could not increase their dividends or repurchase any shares in an effort to preserve capital in response to the COVID-19 pandemic. This policy worked and the average Tier 1 Common Equity Ratio (CET1 Ratio) for the six largest Canadian banks increased from a 2020 low of 11.2% to 13.1% currently. As a result, on November 4, 2021, OSFI announced that banks could resume dividend growth and share buybacks.

Average CET1 Ratio (Big 6 Canadian Banks)

Now that these restrictions have been lifted and given their strong capital levels, we believe that the Canadian banks will prioritize a return to above average dividend growth along with share buybacks, organic growth, and M&A. Based on our analysis below, we believe that the banks could increase their dividends by an average of 18% in 2022 to return to the midpoint of their target payout ratios. Alternatively, dividends would need to increase by 22% for the banks to see a return to their historical average payout ratios.

Ticker	LTM Dividend	2022E EPS (Consensus)	Target Payout Ratio ¹	Est. Dividend at Target P/O	Growth	15-yr Avg. Payout Ratio	Est. Dividend at Avg. P/O	Growth
BMO	\$4.24	\$12.44	45%	\$5.60	32%	51%	\$6.35	50%
BNS	\$3.60	\$7.89	45%	\$3.55	-1%	49%	\$3.87	7%
CM	\$5.84	\$14.30	45%	\$6.43	10%	47%	\$6.72	15%
NA	\$2.84	\$8.89	45%	\$4.00	41%	42%	\$3.73	31%
RY	\$4.32	\$11.14	45%	\$5.01	16%	47%	\$5.24	21%
TD	\$3.16	\$7.59	45%	\$3.41	8%	44%	\$3.34	6%
Average					18%			22%

Along with our expectation for above average dividend growth in 2022, we also believe that interest rates will rise next year, which is positive for the banks. In response to strong economic growth and above trend inflation, the Bank of Canada (BoC) will almost certainly begin hiking rates in 2022, with the market currently anticipating the policy rate to increase by over 100 bps by next September.

BoC Implied Policy Rate (%)

Source: Bloomberg (November 4, 2021)

In addition to above average dividend growth and rising rates, we also believe that there are a number of cyclical and secular tailwinds that are supportive of banks at this time, including:

- a strong economy that remains supportive of loan growth and capital markets activity;
- banks continue to become more efficient by cutting costs, including the rationalization of their branch networks and focusing on digital offerings; and
- banks remain cheap, trading at a discount of 28% to the TSX.²

Based on these factors, we believe that Canadian banks represent a compelling buying opportunity for investors at this time.

Brompton's Approach

At Brompton, we have decades of experience investing in Financials and have several products that investors can use to get exposure to the banks, including split share funds that provide leveraged exposure to the banks, and ETFs. The following Brompton funds all trade on the TSX and focus specifically on Financials:

Ticker	Ticker	Dstrb. Rate ³	Annual Compound Returns ⁴				S.I. ⁵
			1-Yr	3-Yr	5-Yr	10-Yr	
Brompton Split Banc Corp.	SBC	7.7%	123.3%	21.6%	17.9%	17.8%	12.7%
Life & Banc Split Corp.	LBS	12.1%	156.5%	25.3%	17.5%	20.3%	11.3%
Brompton North American Financials Dividend ETF	BFIN	3.9%	62.2%	15.5%	-	-	14.1%

¹ Based on target midpoint. BMO, CM, NA, RY and TD all target a payout ratio of 40-50% of EPS. BNS does not have a formal payout ratio, so we have assumed 45% to be consistent with the other banks.

Commissions, trailing commissions, management fees and expenses all may be associated with exchange-traded fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Exchange-traded funds are not guaranteed, their values change frequently and past performance may not be repeated.

You will usually pay brokerage fees to your dealer if you purchase or sell shares of the investment funds on the Toronto Stock Exchange or other alternative Canadian trading system (an "exchange"). If the shares are purchased or sold on an exchange, investors may pay more than the current net asset value when buying shares of the investment funds and may receive less than the current net asset value when selling them.

There are ongoing fees and expenses with owning shares of an investment fund. An investment fund must prepare disclosure documents that contain key information about the fund. You can find more detailed information about the fund in the public filings available at www.sedar.com. The indicated rates of return are the historical annual compounded returns including changes in the share value and reinvestment of all distributions and do not take into account certain fees such as redemption costs or income taxes payable by any security holder that would have reduced returns. Investment funds are not guaranteed, their values change frequently and past performance may not be repeated.
