Overview

This ETF provides high monthly distributions and the opportunity for capital appreciation through an investment in an actively managed portfolio of large-cap global dividend growth companies selected by Brompton, complemented by a proprietary covered call options program.

Our PM team first uses a top-down analysis to identify attractive sectors. Rigorous fundamental analysis focuses the portfolio on Global Dividend Growth Companies with a market capitalization of at least \$10 billion, that have a history (or in the Manager's view a future likelihood) of dividend growth. The PMs then set the level of covered call writing, with the goal of optimizing distributable cash and total returns, while reducing portfolio volatility.

Investment Highlights: Global Dividend Growers

- Global Dividend Growers have historically outperformed the MSCI World Index with lower volatility³
- Opportunity to access a broader universe of high quality global companies that are expected to achieve strong earnings growth, leading to potential share price appreciation and increased dividends
- Global equities provide opportunity for Canadians to diversify in sectors that are underrepresented in Canada
